**Proteck Home Improvements**

**PRODUCTS:**

**Enhanced Expanded Polystyrene Insulation  
& Silicone Render Finish**

**SURFACE:**

**Walls**

**SUBSTRATE:**

**Brick, Stone, Concrete Panels,  
Masonry and Breezeblock**

**A domestic property in Bristol has been renovated to make it significantly more energy efficient, using a range of Johnstone's Trade products.**

Proteck Home Improvements were tasked with installing Johnstone's Trade Stormshield EWI system to the 500sq/m property, which had poor energy efficiency performance.

Due to a variety of substrates being used on site, different thicknesses of grey Enhanced Expanded Polystyrene insulation was used, and finished off with Johnstone's Silicone Enhanced Render Finish in cream for long lasting exterior weather protection.
