APPLICATION

1. SMTCR is a two part product. Remove part A and part B from the tub prior to activation.

2. Thoroughly shake part A and pour it into the mixing tub.

3. Add part B.

4. Mix with a suitable paddle mixer for 2-3 minutes.

5. Allow to stand for 3 minutes, then mix for a further 2-3 minutes.

6. Apply using a stainless steel trowel or suitable spray equipment.

7. Cross trowel to ensure the minimum amount of material is applied to the correct thickness.

8. Finish with a plastic float, working the material in small circular motions.

FEATURES AND BENEFITS

No primer required – the product can be applied directly onto the basecoat, increasing the speed of the application.

Apply in low temperatures – can be applied in zero degree temperatures, removing the limitations of seasonal weather.

Fast drying – sets in 2-3 hours increasing productivity on the job and the risk of wash off.

Silicone Additive – removes risk of water contamination impacting the colour of your render.
