## FRANKLEY INDUSTRIAL ESTATE – BIRMINGHAM

CLIENT:  
**Opaque Decorators**

SURFACE:  
**Flooring, Exterior & Interior Walls & Ceilings**

PRODUCTS:  
**PPG High Build Epoxy Floor Coating, Johnstone's Jonmat  
Premium Contract Matt, Johnstone's Steel and Cladding  
Semi-Gloss Topcoat**

---

**Completed in September 2017, Johnstone's decorative products and PPG's heavy duty epoxy floor coatings provided the perfect combination to renovating the whole industrial estate – inside and out.**

Part of a wider £30,000 refurbishment project, Opaque Decorators required a long lasting floor coating that would withstand regular foot and forklift traffic, in addition to providing a specification that would provide a long lasting decorative finish to the building's interior and exterior.

Throughout the industrial estate, PPG EP301 High Build Epoxy Floor Coating was applied to all internal areas in Mid Grey. Perfect for application onto new and existing concrete floors, PPG EP301 is a two component, solvent free product that provides a smooth, easy to clean finish resistant to oil and chemical spillage and has excellent wear resistance to low moderate abrasion; such as foot and rubber tyre traffic (Ferfa Type 3).

Additionally, to complete the refurbishment, Johnstone's Steel and Cladding gloss was applied in RAL 5015 to the exterior, providing long lasting protection against corrosion. Whilst Johnstone's Jonmat Premium Contract Matt in Brilliant White was applied to the walls and ceilings to provide excellent coverage, leaving a permeable breathable finish.
